---

### EXPERIENCE

---

#### Senior Mobile Developer

Okt 2022 - Now

Lembaga Pengelola Dana Pendidikan – Jakarta, Indonesia

LPDP is an institution under the auspices of the Indonesian Ministry of Finance. In project development, there are 2 applications that have been built, namely the ebeasiswa application which is useful for making it easier for prospective scholarship recipients to obtain accurate and integrated information and the erispro application which is useful for making it easier for Indonesian research researchers to find out proposal data and monitor funds in real-time. The technique used uses rest-api as the service interaction path and Microsoft SQL Server as the database. To make it easier to monitor, this application is also equipped with a Firebase SDK and several related regulations to make it easier for users to use it and make data security more guaranteed.

#### Job Description :

- Build container environments in firebase development or production
- Carry out project alignment on the server to be developed
- Install service components on the server required by the project and maintain the environment so that it has a certain scope
- Adapting the UI/UX design set by the user and avoiding repeated use of widgets

- Developing restfull-api for services used with laravel lumen and assigning several authentication keys (jwt, csrf) to the service to minimize incoming attacks
- Wrapping the services used with routes that have been determined by the middleware in order to maximize request performance
- Determine the technological requirements that will be used by the framework in the features
- Create an mvc schema in the framework to facilitate long-term maintenance of the application
- placing several errors that will be received by the application and api service to avoid algorithm damage (deadlock)

**Technology in use :** Flutter, Laravel/Lumen, MVC, MsSql, Restfull API, WSL2, firebase sdk, Rubyrails, figma
